

Battery Charging

- Use the included wall charger
- The keyboard should be turned off
- Allow the keyboard to charge for 4.5 hours
- The battery LED will turn green once fully charged
- Once disconnected from the wall charger the battery LED will turn off

Charger le clavier

- Utiliser le chargeur fourni
- Éteindre le clavier pour le charger
- Laisser le clavier charger 4 1/2 heures
- Le voyant/LED de batterie sera vert quand le clavier a fini de charger
- Une fois le clavier débranché du chargeur, le LED s'éteint

Battery Charging DEU

- Use the included wall charger
- The keyboard should be turned off
- Allow the keyboard to charge for 4.5 hours
- The battery LED will turn green once fully charged
- Once disconnected from the wall charger the battery LED will turn off

Tap typing technique

The Cleankeys keyboard allows you to rest your fingers on the home row keys without activating keystrokes. Keys will not be activated unless they detect that they have been "tapped".

To create a tapping motion, simply lift then drop your finger in an upwards then downwards motion.

To repeat a keystroke tap twice and hold.

Tap - La technique de frappe

Le clavier Cleankeys vous permet de reposer vos doigts sur les touches sans activer le frappe. Les touches ne sont pas activées à moins qu'elles soient frappés.

Pour créer un mouvement de "tap", il suffit de soulever puis déposer votre doigt dans un mouvement vers le haut puis vers le bas.

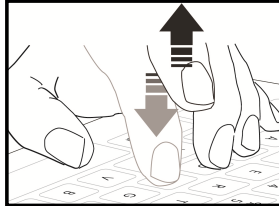

Pour créer un répétition de touches frapper deux fois de suite et maintenir le doigt sur la touche.

Tap typing technique DEU

The Cleankeys keyboard allows you to rest your fingers on the home row keys without activating keystrokes. Keys will not be activated unless they detect that they have been "tapped".

To create a tapping motion, simply lift then drop your finger in an upwards then downwards motion.

To repeat a keystroke tap twice and hold.

Sleep Mode

Your Cleankeys keyboard will enter sleep mode after a minute of not being in use. This is to maximize battery life.

The keyboard will automatically wake up when your hands come close to the sensors located below the space bar.

Mise en veille

Votre clavier cleankeys se mettra en veille après une minute sans contact. Ceci économise la batterie et votre clavier se réveillera quand vous y approchez vos doigts.

Sleep Mode DEU

Your Cleankeys keyboard will enter sleep mode after a minute of not being in use. This is to maximize battery life.

The keyboard will automatically wake up when your hands come close to the sensors located below the space bar.

Cleaning

To start cleaning the keyboard press Fn + F1. This will pause the keyboard and prevent unwanted typing during cleaning. The glass surface can be cleaned with most medical grade cleaners or disinfectants currently in use.

Note: We strongly recommend consulting with the disinfectant/cleaner manufacturer to ensure their product is safe for use on Glass.

Cleaning FR

To start cleaning the keyboard press Fn + F1. This will pause the keyboard and prevent unwanted typing during cleaning. The glass surface can be cleaned with most medical grade cleaners or disinfectants currently in use.

Note: Nous vous recommandons fortement de consulter le fabricant du désinfectant / nettoyant pour assurer que leur produit peut être utilisé sur des surfaces en verre

FAQs

Dimensions

L: 17.21 in. (437.1 mm) **W:** 5.85 in. (148.6 mm) **H:** .91 in. (23.1 mm)

Weight

1.56 lbs (0.71 kg) Glass

Material

Base - ABS/Polycarbonate blend

Corning® Gorilla® Glass Top - Lightweight, tough, scratch resistant glass

Power Specifications: USB 5V, 1 A nominal

USB Cable: 6.6 ft. (2.0 m)

Supported OS: Windows, Mac

Warranty: Two Years

Contains transmitter module:

FCC ID: XWS-CKW
IC: 8721A-CKW

This module has been granted limited modular approval when used with the PPxMnnWx30 Cleankeys 3 Main Board. Manufacturing and installation of this module has been monitored by Cleankeys Inc. to guarantee full compliance.
